

Project Information Management (PIM) software

for Architects, Engineers Contractors and Owners on Microsoft Office365 SharePoint

For companies that have a Cloud strategy and Microsoft technology at the core of their business and IT investment, Atvero provides a scalable and flexible information management solution that adds value to project delivery.

Atvero seamlessly integrates with Microsoft Office365 to organise and centralise the creation and management of project documents, drawings, contacts and emails. Maintaining accurate records across all projects has never been simpler than with Atvero.

Full mobile compatibility means the information can be delivered to team members wherever they are.

Integration with Azure AD and Microsoft Groups means team members stay connected, coordinated and up to date. Unlike proprietary database and indexing technologies which require additional work and effort, Atvero is already embedded within your business processes.

Six Pillars for Improved Project Efficiency, Better Quality and Reduced Risk

Value Pillar	Business Process	Business Impact
 Control	Managed document and drawing sheet creation. Revisions, transmittals, publishing and tracking of project deliverables.	Control data anarchy. Avoid duplication. Reduce administrative data handling.
 Communicate	Outlook email and contacts for Project communication.	Aligned with business culture. Eliminates ambiguity. Save time spent looking for information.
 Connect	Microsoft Office365 Cloud solution connecting information with project teams and core project applications.	Work anywhere, on any device.
 Comply	Industry and company file-naming, workflows, QA, data security, backup and data retention.	Improve data integrity. Safeguard and enhance reputation. Mitigate risks.
 Converge	Autodesk and Microsoft authoring tools for information generation. Tasks, Notes, Calendars and Dashboards for supporting information.	Assist decision making. Monitor actionable insights. Increase productivity.
 Cost	Affordable, cost efficient application with SaaS product lifecycle, requiring no servers. Extending value of Microsoft subscription.	Zero time investment to start. Central administration. Minimal training. No data lock-in.

✓ *"Please make it easy to use standard naming conventions like BS1192 for my drawings. I can't understand all those codes and numbers."*

✓ ***"Will Atvero help me meet my organisation's ISO9001 QA objectives and PI insurer requirements?"***

✓ *"My team have to send and receive information easily but also in a managed way, with a full audit trail."*

✓ ***"We need a simple project setup workflow complete with templates and drawing lists. We also want to delegate access to projects to team leaders?"***

✓ *"Can I publish drawings for issue, with revisions and suitability codes from Revit to Atvero?"*

✓ ***"Can I have the same contacts in Outlook and Atvero? Will it show me the role that contact had and can I search across projects?"***

✓ *"Please tell me what the latest revision is for a document or drawing and show me information sent to a given person, when, and for what purpose."*

✓ ***"I just want to be able to find project information quickly, wherever I am, on any device."***

✓ *"I need to keep certain sensitive emails, documents and client contact details separate and only viewable by authorised individuals."*

Take SharePoint to the next level

Key requirements	SharePoint	Atvero + SharePoint
Modern, easy to use	✓	✓
Data integrity	✓	✓
Tiered security and search by Project	✓	✓
Organise, access, share, search	✓	✓
ISO 19650 / BS 1192 (BIM Level 2) naming	✗	✓
Document issue audit (transmittals, CDE, extranet...)	✗	✓
QA compliance	✗	✓
Contact integration by role and organisation	✗	✓
Issue sheets from Revit	✗	✓
Full construction-ready revision and version history	✗	✓
Project email filing	✗	✓

An integral part of your digital toolbox

“ **Atvero PIM** provides Chapman Taylor with a modern and scalable Project Information Management solution that meets our business needs for the next decade and beyond. For Chapman Taylor to be competitive, win and deliver more successful projects, we need a platform that gives us flexibility, but also rigour in our project delivery processes. **Atvero PIM offers us this capability.** ”

Andy Hudson, Director, Chapman Taylor
